

# Toxic Amblyopia

**Alcohol** can not only affect our liver, kidneys and brain pathways, **repeated misuse can have a permanent effect on our eyes.**

Imagine not being able to distinguish between a **red** or **green** light while driving. Imagine your once clear eyes always **red**, due to irreversible damage to the blood vessels. Imagine not being able to see someone's face clearly or watch a movie without *blurred* images. Think about the health risks before you take another drink.

**Blurred Vision**

**Color Distortion**

**"Bloodshot" eyes**
