#### Head Lice Check List (First Day)

Date:

Student:

Class:

Dear Parent/Guardian:

You child has been found to have head lice. Head lice spread very easily, and even the cleanest child can become infested. Outbreaks are common among school children. Prompt treatment of your child will not only make him/her more comfortable, but also protect the rest of your family.

**\*\* According to HHBOE policy 5141.22 \*\***

- 1. Children MUST be escorted directly to the nurse's office by their parent/guardian.**
- 2. All children must be checked and cleared by the school nurse before returning to class.**
- 3. Treatment letters must be returned along with the empty box of the product used.**

**A student may return and be cleared to attend school with a written doctor's note indicating the student has been treated, examined and cleared to attend school.**
