

**8451 CONTROL OF COMMUNICABLE DISEASE (M) - Regulation****A. Detection of Communicable Diseases**

1. Teachers will be trained to detect communicable diseases in pupils by recognizing the symptoms of disease.
2. In general, a pupil who shows one or more of the following symptoms should be sent to the school nurse for evaluation and/or treatment:
  - a. Pain, generalized or specific,
  - b. Chills,
  - c. Fever,
  - d. Earache,
  - e. Vomiting,
  - f. Sore throat,
  - g. Enlarged glands,
  - h. Skin eruption,
  - i. Running nose, or
  - j. Red and discharging eyes.
3. A pupil who shows symptoms of any of the following communicable diseases should be sent promptly to the school nurse for evaluation.
  - a. Chicken pox: Small reddish, itchy eruptions on the skin resembling pimples or blisters, which later fill with fluid and form crusts; slight fever.
  - b. German measles (rubella): A common cold followed by a light red rash on face and body; small beady lumps behind ears; slight fever.
  - c. Measles (rubeola): Cold, runny nose, watery and light-sensitive eyes, fever, followed by bluish-white specks (Koplik spots) on inside of mouth, red blotchy rash, and dry cough.

- d. Mumps: Tenderness and swelling of the salivary glands below and a little in front of the ear; fever.
  - e. Streptococcal infections (including scarlet fever, sore throat, and erysipelas): Sudden onset of fever, sore throat, strawberry tongue, followed by bright red rash on body, usually on the inner arm and thigh.
  - f. Whooping cough (pertussis): A common cold, with irritating cough, followed by repeated series of violent coughs without inhaling, often with respiratory whoops. Cough may end with vomiting.
  - g. Fifth disease (erythema infectiosum): Fine rash that is most apparent on the cheeks and later spreads to arms and legs, low grade fever.
  - h. Pink eye (conjunctivitis): Redness of white areas of eyes, accompanied by some itching; eyes may discharge pus and be light sensitive.
  - i. Head lice (pediculosis): Itching scalp, presence of lice and nits at hair roots.
  - j. Impetigo (staphylococcus infection): Lesions.
  - k. Meningitis-meningococcal: Severe headache, chills, vomiting, convulsions, fever, stiff neck, pain in neck.
  - l. Hepatitis infectious: Fever, anorexia, nausea, malaise, abdominal discomfort, followed by jaundice.
4. Any person who is ill or infected with any disease below and as outlined in N.J.A.C. 8:57-1.3 or any communicable disease, whether confirmed or presumed will be reported immediately by the school Principal to the County Health Officer or to the New Jersey Department of Health if the County Health Officer is not available. Such telephone report will be followed up by a written report or electronic report within twenty-four hours of the initial report. The diseases to be immediately reported are:
- a. Botulism (Clostridium);
  - b. Diphtheria (Corynebacterium diphtheriae);
  - c. Haemophilus influenzae, invasive disease;
  - d. Hepatitis A, institutional settings;
  - e. Measles;
  - f. Meningoccal disease (Neisseria meningitidis);

- g. Pertussis (whooping cough, bordetella pertussis);
- h. Plague (Yersinia pestis);
- i. Poliomyelitis;
- j. Rabies (human illness);
- k. Rubella;
- l. Viral hemorrhagic fevers, including, but not limited to, Ebola Lassa, and Marburg viruses;
- m. Foodborne intoxications, including, but not limited to, mushroom poisoning;
- n. Any foodborne, waterborne, nosocomial, outbreak or suspected outbreak or any outbreak or suspected outbreak of unknown origin;
- o. COVID-19**
- pø. Any other disease included in N.J.A.C. 8:57-1.3.**

**B. Exclusion From School**

1. A pupil who exhibits any of the symptoms described in A2 or whose condition suggests the presence of a communicable disease as described in A3 or A4 will be sent to the school nurse's office. The teacher will ensure that the pupil is accompanied by an adult or a responsible pupil.
2. The teacher will communicate to the school nurse, directly or by written note, the reason for which the pupil is sent for medical assessment.
3. The school nurse will examine the pupil and, in consultation with the school medical inspector if the pupil's condition so indicates, recommend to the Principal the pupil's exclusion from school for medical reasons.

**If a student is suspected of having COVID-19 and has:**

- **Had no contact with anyone who has tested positive**
- **Not traveled to a highly impacted area/state**
- **Another condition, such as the flu**

**In conjunction with the threat level remaining low in Bergen county, school will not close**

**If a student is suspected of having COVID-19 and has:**

- **Had contact with a person that has tested positive for COVID-19**

- **Traveled to a highly impacted area/state**
- **No other medical condition, such as the flu**

**In conjunction with the threat level remaining low in Bergen county, school will not close**

**If two or more students test positive for COVID-19 in a school building, the school will close for 2-5 days.**

4. In the event neither the school nurse or the school medical inspector is available to be consulted about the pupil's condition, the Principal may determine to exclude the pupil from school.
5. The parent, adult family member, or other responsible adult designated by the parent will be promptly notified by telephone of the pupils' exclusion and requested to come to school to fetch the pupil. Until the adult arrives to remove the pupil, the pupil will be kept in an isolated location in the school and will be made as comfortable as possible. The pupil will be supervised at all times by a school staff member.

#### C. Readmission to School

1. A pupil who has been excluded from school or retained at home by reason of having or being suspected of having a communicable disease shall not be readmitted to school until the pupil presents written evidence that he/she is free of communicable disease.
2. Evidence that a pupil is free of communicable disease will consist of the certification of the school medical inspector or another qualified physician who has personally examined the pupil. **In cases of COVID-19, a negative COVID-19 test result must be submitted to the school.**

No pupil who has had a communicable disease will be readmitted to school until a physician's certificate indicating the symptoms of the disease have ceased has been provided to the Principal or designee or the school nurse.

#### D. Reports

1. The school nurse will file such reports as may be required by the New Jersey State Department of Health and in the reporting of communicable diseases in schools.
2. When the rate of school absenteeism is in excess of fifteen percent, the school nurse shall report the absenteeism to the local and/or the County Board of Health.
3. The teacher may, with the advice and consent of the Principal and the school nurse, inform the parent(s) or legal guardian(s) of pupils in his/her class that a pupil in the class has contracted a communicable disease. The information given to parents or legal guardians may include the specific symptoms of the disease and parent(s) or legal

guardian(s) may be encouraged to consult their personal physicians for inoculations that may prevent the disease or ease the symptoms of the disease.

**HASBROUCK HEIGHTS PUBLIC SCHOOLS**  
**SCHOOL HEALTH SERVICES**  
**RETURN TO SCHOOL GUIDELINES**

In an effort to safeguard your child's health and the health of all the children in our school, the following will help stop the spread of infection among students and staff. Please contact your school nurse if you have any questions.

**Strep Throat**

Children may return to school after they have been free of a fever for 24 hours without the assistance of medication to lower their temperature. If they were prescribed an antibiotic it must be taken for a **FULL 24 hours** before returning to school. A doctor's note must be provided to return to school.

**Fever**

Children may return to school when the temperature has been normal for **72 hours (3 full days) without the use of medication. If a student was suspected of having COVID-19 a doctors note clearing them of the virus will also be required for their return.**

**Cold**

Children should stay home if they are too uncomfortable to complete their work and/or if they have a persistent or severe cough.

**Vomiting**

Children must be symptom free for 24 hours and be able to hold down food and fluids before returning to school.

**Rashes**

Students presenting any symptoms of potential contagious or communicable conditions must report to the school nurse and maybe be excluded from school until condition resolves or they present a note from their physician stating the diagnoses and that this condition is not communicable.

**Chickenpox**

Student's must remain at home until lesions are healed and dried when diagnosed with chickenpox or other similar diseases.

**COVID-like Symptoms** A student sent home with COVID-like symptoms will be referred to the child's

primary care physician for testing and return to school clearance. The student must be fever free for 72 hours without the use of medication and provide a doctor's note upon return to school.

**Conjunctivitis (Pink Eye)** Children who have pink/red eyes with white/yellow discharge often with matted eyelashes, eye pain, redness of the eyelids or skin surrounding the eye may have pink eye.

1. Children need to be medically excused from school.
2. He/She may return 24 hours **AFTER** the first dose of antibiotic eye drops.
3. A medical note is required to return to school.
